Dear [REDACTED]

We have not had any cases of hepatitis following N.H.S. Factor VIII. As far as your suggestion about transfusing mild haemophiliacs with this material is concerned, I totally disagree with this concept. I do not wish any of my mild haemophiliacs to develop hepatitis in any form and therefore adopt the policy of either using D.D.A.V.P. or Cryoprecipitate.

Yours sincerely,

[REDACTED]
